RAG UI Implementation

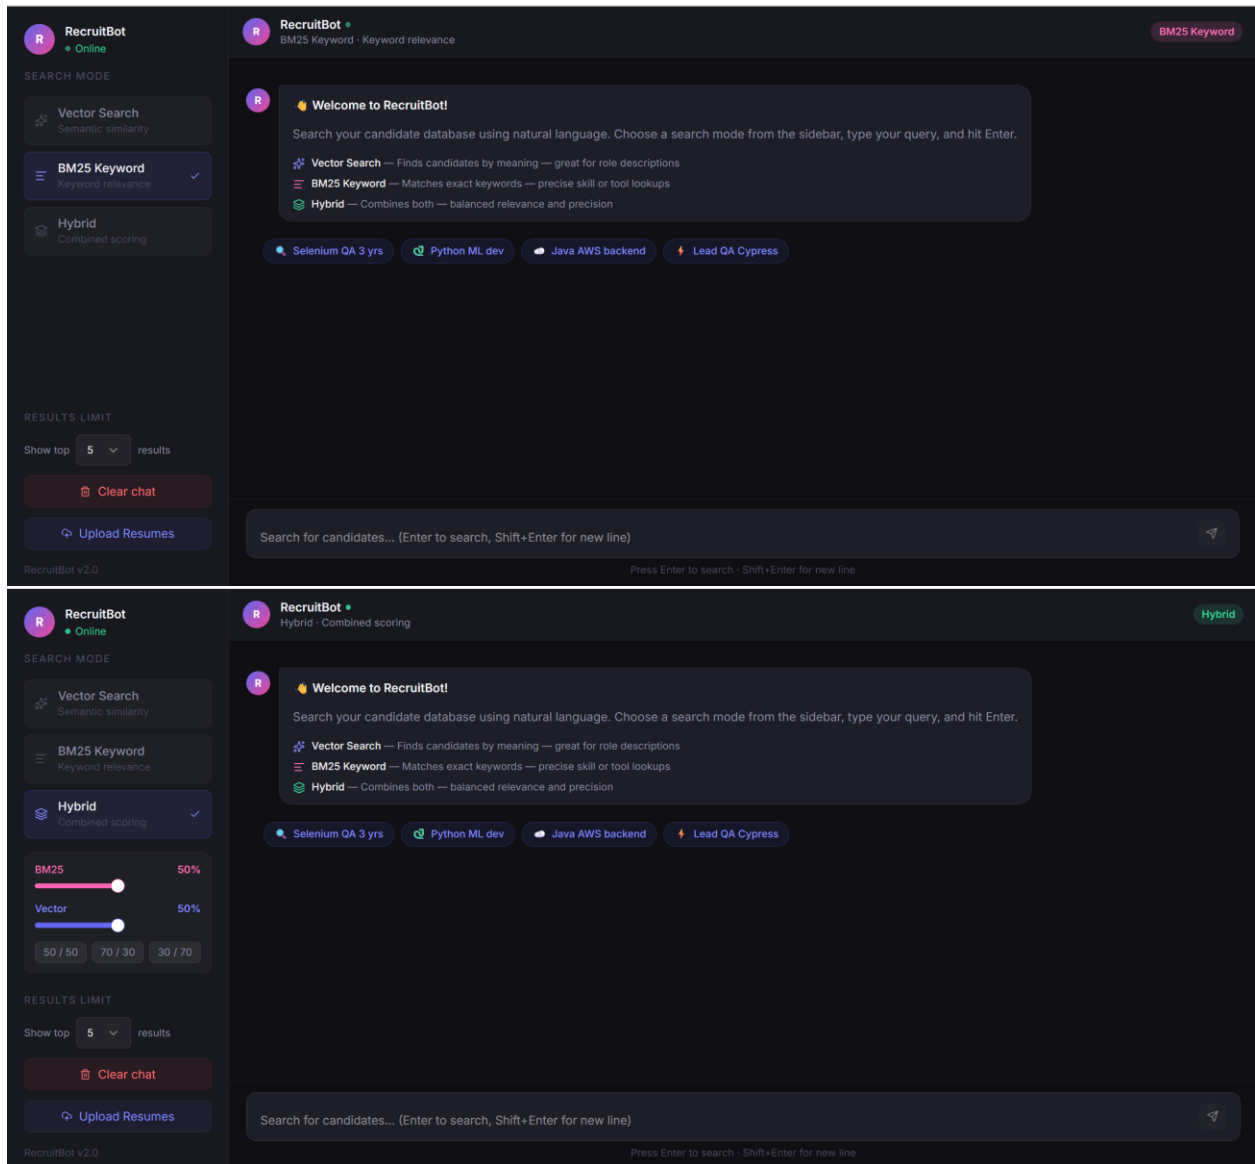

The image displays the development environment and the resulting web application for the RAG UI.

VS Code Environment:

- Explorer:** Shows the project structure for `RESUMES-AI-RAG-UI`, including `recruitbot-web` and its subdirectories (`dist`, `node_modules`, `public`, `src`).
- Terminal:** Shows the command `npm run dev` being executed in the `recruitbot-web` directory. The output indicates that Vite v8.0.14 is ready in 1274 ms and provides the local URL `http://localhost:5173/`.
- Environment Variables:** The `.env.development` file is open, showing `VITE_API_BASE_URL=http://localhost:3000` and `VITE_APP_NAME=RecruitBot`.

Web Application (localhost:5173):

- Header:** The application is titled "RecruitBot" and is in "Online" status. A "Vector Search" button is visible in the top right.
- Search Mode:** A sidebar on the left allows selecting between "Vector Search" (Semantic similarity), "BM25 Keyword" (Keyword relevance), and "Hybrid" (Combined scoring). "Vector Search" is currently selected.
- Results Limit:** A dropdown menu shows "Show top 5 results".
- Buttons:** "Clear chat" and "Upload Resumes" buttons are located at the bottom of the sidebar.
- Search Results:** The main area displays a "Welcome to RecruitBot!" message and a list of candidate tags: "Selenium QA 3 yrs", "Python ML dev", "Java AWS backend", and "Lead QA Cypress".
- Search Bar:** A large input field at the bottom prompts the user to "Search for candidates..." with instructions to press Enter to search and Shift+Enter for a new line.

Searched in chat for selenium automation engineer 3 years

The screenshot displays the RecruitBot web interface. On the left sidebar, the 'Hybrid' search mode is selected, with sliders for BM25 (50%) and Vector (50%) weights. The main chat area shows a search query 'Selenium automation engineer 3 years' and five results. The top three results are visible:

Rank	Name	Score	Job Title	Summary
